Profile Summary

A dedicated and versatile 3rd Year Computing Science Student of the University of Glasgow. I am motivated to and enjoy continuously learning. I aspire to always contribute my best and make a positive impact through my work.

Education

University of Glasgow – Computing Science BSc – 2023-2027

Computing Science – Areas studied:

- Algorithmics and Data Structures
- Principles and practice of software Engineering – team project
- Human-Computer Interaction, UX design – small team project
- Systems Programming
- Data Fundamentals – Matrices, Linear Algebra, Optimization

Subjects to be studied 2nd Semester before term of internship:

- Database Systems
- Network Systems
- Mobile App Development and HCI
- Cyber Security Fundamentals

Digital Media & Information Studies - 1A/B

A course covering digital information's creation and role in society, including media, web and data technologies. More philosophical and psychological, which is of interest to me, corresponding with the values of 'responsible innovation' and 'critical thinking'. It is important to me that my work improve people's lives in some way.

Mathematics - 1017

A broad introduction to advanced mathematics, relating to concepts in Algorithmics and Data Fundamentals especially.

History of Art - 1A/B, 2A/B

Through 1st and 2nd year this was a joint-honours subject. For 3rd year I switched to single honours to gain a more focused path in Computing Science. The skills this has provided me in written work, research, and general mindset are something I have confidence in. I have found the process of writing, of creation, to heavily mirror that of engineering software. As a part of history at large, I feel it has provided me a broader view of societal issues, politics, psychology, commissioned works and written communications. These are useful qualities as roles will often be more than simply technical, working with teams and clients.

Work Experience

Card Factory – Seasonal Sales Assistant

October 2023 to start of year 2024

Responsibilities included processing a large number of transactions, fielding customer queries, conducting stock counts and maintaining the store's presentation and hygiene.

Voluntary Work for parent, similar to a labourer

2019 - 2023

Gained several new skills, working with time-sensitive materials such as concrete and plaster. Responsibilities included cleaning and repairing surfaces, manual labour in collaboration with others and operation of new tools including a digger and tractor.

Technical Skills

Python, Java, C, C#, C++, .NET, Git, CSS, HTML, Figma, JavaScript, PHP

Soft Skills

Problem Solving, Time Management, Communication, Critical Thinking, Adaptability, Resilience

Values

Reliability, Responsible Innovation, Open-Mindedness, Collaboration, Curiosity, Information Exchange

Extracurricular work

Glasgow University Tech Society

Aiding setup, operations and retrospectives to develop communication, management and adaptability. Attendance of the arranged hackathons of GUTS and GUDEV allows fast-paced learning and teamwork development.

Glasgow University Battery Society

Focusing on the improvement of battery cells, I am working with others on the development of a battery management system – using an Arduino Uno with C++. This requires I keep up with information relating to electrical circuits and research of the field.

Glasgow University Wind Band & Brass Ensemble

9 years of experience on Baritone Horn, developing skills of cooperation, coordination, dedication and versatility in various ensembles.

Industry Events

I attend events such as talks on various technologies and topics including Digit Expo in 2024.

I attended a spring week with Accenture which included a team project of designing of a website.

General Interests

Fine Art – Practice and History, Music, Linguistics and translation, Japanese & French language, Science Communications, GLAM sector operations and Outreach, Physics & Chemistry
